If you've been wanting more efficiency at your checkout counter, check out the smooth and reliable operation of the ER-A450S. With the quick and reliable performance of the ER-A450S, you'll cash in on convenience.

On-line capability and scanner-ready with RS-232 interface.

The ER-A450S comes standard with two RS-232 interface ports for system expansion. By connecting it to a PC, sales data can be downloaded from the ECR for efficient data management. An optional scanner can also be connected, giving you the advantage of speedy and accurate barcode entry.

High-speed thermal alpha printing

Thanks to an advanced thermal alpha printing system, information including sales item names, cashier name and messages can be printed on customer receipts.

Easy programming

The ER-A450S's interactive programming guides the operator through simple programming tasks. The ER-A450S presents cursor-defined options, allowing the user to easily input the information by making appropriate selections. This programming method eliminates unnecessary service calls and allows user to programme and modify the ECR simply and efficiently.

High-capacity, space-efficient drawer

Five bill compartments and eight coin compartments ensure your profits are safely sorted and secured.
