SUPERIOR FEATURES & FUNCTIONALITY

AT A PRICE SURE TO PLEASE

Designed for hospitality applications, the Sharp UP-700 delivers the kind of power, efficiency and expandability that will make your job and life easier and more productive. Reliable hardware and powerful software combine to provide an easy to use POS solution that will help you serve your customers faster and more efficiently and keep them coming back.

The UP-700 has an entire menu of software features designed to increase speed of service and efficiency **including integrated gift card and contactless payment functionality.** Powerful built-in software enables "on-the-fly" price changes, daily specials and combo tables with upsize function.

The UP-700's fully adjustable, extra-large multi-line back-lit LCD display makes it easy for cashiers to correctly enter and track orders. Multiple RS-232 ports offer even greater expandability so your POS system can grow with your business. Customized receipts can be printed on demand with fast, quiet thermal printing.

Delivered and supported by our authorized dealers, these exceptional features are components of an integrated software and hardware package from Sharp. The brand you know and trust to deliver the best POS technology.
