FS-3700 Touchscreen ECR

Comprehensive, Flexible and Sophisticated POS Functionality

TEC FS-3700 R4 Touch Screen ECR

The most comprehensive, flexible and sophisticated ECR available today. The FS-3700 is a true Point-of-Sale terminal with an embedded GUI operating system for the added reliability of a traditional cash register. A product for various restaurant types including quick service, casual and white table cloth dining establishments, coffee shops and cafeterias.

Easy to use cash register concept, delivering true POS functionality.

Each restaurant is unique, so why shouldn't the POS system be designed to compliment that distinctiveness? With the FS-3700, flexibility is the key attribute of this well-designed product. With the ability to easily create customized screens, menu item definitions and other critical details, the FS-3700 will undoubtedly meet the needs of the individual restaurant operator.

FS-3700 System Features

- Embedded GUI Operating System
- No hard drive required
- No single point of failure

- Optional kitchen video system
- Coin dispenser and order confirmation interface
- Foreign currency transactions

All company and/or product names are trademarks and/or registered trademarks of their respective owners. All features and specifications described on this brochure are subject to change without notice.

Smart Design

The advanced design of the FS-3700 is stylish and functional. The compact and streamlined cabinetry hides unsightly cable connections and tucks them neatly underneath the base of the unit where they need to be. The low profile design provides an unobstructed view of the customer and frees valuable counter space.

Operations - Table Service

Table Service establishments can equally benefit from this powerful and feature rich system

- On-screen table management
- Easy separate check features
- Meal periods with auto menu price level changes
- Custom kitchen messages
- Assign customer name to bar tabs
- Combine check functions
- Auto gratuity by guest count
- Priority sorting for kitchen printers

Management Control

The FS-3700 provides a list of comprehensive reports available at each station that is beyond what you would expect from other products in its class. In addition, the FS-3700 can be expanded to provide establishments with backroom software to further streamline restaurant operations by providing enhanced reporting and system management.
