rev. 1/11

Keystroke Advanced POS
Feature Summary

Comprehensive Point Of Sale Functionality – *adaptable to most any retail or wholesale business operation*
- Sales invoices, cash receipts, quotes, layaways, on-hold, sales orders, service orders, gift registry (customizable forms)
- Automated recurring transactions • Age verification • Quick Search item/customer lookup
- Multiple printers, remote printers, multiple forms • Multiple drawers, clerk assigned tills, cash reconciliation tools

Customer Service and Accounts Receivable – *unique flexible features for unique growing businesses*
- One-of-a-kind Sales Scripting for improved customer service and increased sales – sales clerk reminders, automatic tag-along items, prompt for add-ons or up-sell items, complex item builds with multiple components, out-of-stock alternatives
- Track multiple ship-to addresses, or attribute sales to family members, employees, jobs, departments, vehicles, etc.
- Maintain complete detailed customer history at POS or via reporting • Billing statements

Inventory Control Tools – *extensive database features to help organize and manage even large or complex inventories*
- Multiple fields for sorting and fast lookup, multiple grouping categories • Alternate Codes (new or seasonal packaging)
- Matrix item tracking, up to four dimensions (e.g., size, color, texture, style) • Serial Number tracking • Item weight
- Real-time information • Case break-downs, parent/child adjustments, components, kits • User-definable fields
- Powerful pricing features – multiple price levels, target profit margin, price patterns, quantity price (e.g., 3 for), timed promotions, mixed case/volume pricing, customer sensitive price tables

Purchasing and Cost Management – *save time and reduce costs with powerful ordering and receiving tools*
- Automatic suggested re-order function • Manage multiple sources per item (vendor, cost and part#)
- Average lead time, average fill ratio, expected date • Automatic cost based price updates
- Print custom barcode tags and shelf labels • Physical count utility to identify and reduce shrinkage

Reporting, Data Security and Employee Management – *recording data as it occurs is the key to accurate reporting*
- Report on current status, recent activity, or any date/time range • Dozens of standard report formats with built-in Report Editor
- Advanced security level system – restrict access to modules, functions or data fields • Indisputable audit capabilities
- Built-in time clock with password and/or fingerprint identification • Record clerk and salesperson on sales transactions

PCI PA-DSS Compliant Payment Processing Software Included – *secure, reliable, integrated, efficient, flexible*
- Credit card, PIN debit, check verification, food stamps • Competitive rates, FREE gift card processing
- Third-party payment software not required • Supports a variety of payment card and signature capture devices

System Requirements and Capacities – *minimum requirements – maximum capabilities*
- Requires Windows® XP or later • Traditional PC's or all-in-one POS workstations • Supports nearly all peripheral hardware
- Large customer/inventory databases (up to 1 million records each) • Sales Tax Districts capable of multi-state and nationwide
- Fast access to historical transaction data – virtually unlimited capacity, no purging or archiving necessary
- Exclusive Dataport feature enables real-time custom integration to sales transactions • Variety of import/export tools for all data
- Built-in data link for the most popular accounting packages – QuickBooks,® BusinessWorks,® Peachtree® and others

Available Add-Ons

Digital Sign Controller – *Present customers with real-time POS transaction data and multi-media advertising on any secondary monitor or dual-monitor POS terminal. Fully customizable layout (via XML) and content (supports most graphic formats and live HTML feeds).*
– A versatile and impressive upgrade from dedicated text-only customer display units.

Inventory Production – *Automated quantity adjustments for in-house inventory builds.*

Contract Pricing – *Improve customer retention with unique pricing for individual customers.*

Workstation Licenses – *Add POS workstations as needed – no added cost after ten.*

MultiStore – *Automated data polling, consolidation, and reporting tools for businesses with multiple stores or warehouses.*
