SPS-2000

Multi-Application Touch Screen ECR

Built-In Customer Display Included

Adjustable Screen

Built-In SD Reader Included

Built-In MCR Included

The SPS-2000 is easily configured to meet the needs of various table service, quick service and retail applications. It supports a full complement of POS peripherals, including printers, a comprehensive kitchen video system (KVS), POS scales, scanners and connects to a back office or remote PC for polling and program maintenance.

Optimum Connectivity & Expandability

Sam4s

SPS-2000 MULTI-APPLICATION TOUCH SCREEN ECR

System Highlights

Like PC-based hospitality POS systems, the SPS-2000 features touch screen operation – however unlike PC systems, the SPS-2000 has no hard disk drive, running its proprietary built-in application software from on-board flash memory and storing data on non-volatile RAM. This ECR-like design provides significant advantages in speed, reliability, recovery from power interruptions, and can be setup and installed at a lower cost and in significantly less time than many PC-based POS systems.

- The SPS-2000 provides vivid color with a high resolution super-bright 12.1" TFT LCD touch screen.
- Supports peripherals with six serial, one parallel and two USB ports.
- Networks through Ethernet communications.

- Ergonomically designed, the screen can be tilted from 22° to 77° and the small footprint preserves counter space in cramped quarters.
- High performance flexible memory can be allocated to support large menus or item files, check files, customer reports and employee time/attendance files.

Applications

- **Table Service**
  Casual Dining, Family Style Restaurants, Bar/Restaurants
- **QSR**
  Sandwich, Bakery, Coffee, Taco, Hamburger, Ice Cream
- **Retail**
  Specialty Foods, Specialty Gourmet, Deli's, Liquor, Beer/Wine, Gift Shop
