Display			15.1" TFT
Resolution			1024 x 768 (XGA)
Brightness			250 cd/m2
Touch Panel			5 Wire Resistive
Hard Disk Drive			40GB Standard (3.5") Serial ATA
Customer Display			Option (2 Line x 20 Column VFD)
Magnetic Card Reader			Option (ISO Track 1,2,3)
iButton Reader			Option
Interface	RS-232C	6	COM 1 and 2 (D-sub 9-pin male type connector without power)
			COM 3 (D-sub 9-pin female type connector with power)
			COM4 (D-sub 9-pin female type connector with power for LIUST)
			1 x Modular Jack for MSR, 1 x Internal Use for Touch Panel
	USB	7	6 General 5V USB 2.0 Ports (3 External - Underside/Rear of LCD, 3 Internal Rear Connector Area) * Plus 1 24V Powered USB Port (Internal Rear Connector Area)
PS/2	2	(6 pin MINI-DIN)	
Drawer	2	24V type TEC interface drawer compatible	
VGA	1	Expandable VGA interface. 15-pin VGA female type connector	
LAN	1	10/100Base TX (RJ-45 modular connector)	
Operating Temperature			5 - 40
Operating Humidity			10 - 80 RH No condensation
Cabinet Color			Black
Power Supply			max 150 W
Operating System			WEPOS
Weight			11.5 Kg / 25.4 lb
Dimensions			14.4" (w) x 14.2" (H) x 9.9" (D)

Part Number B-335

WinPOS Restaurant Software

Recipe for Perfection

With Toshiba's award winning ST-A10 POS All-in-one Touch screen terminal as a foundation, the WinPOS Restaurant Software is designed to provide restaurant operators a maximum return on their POS investment.

Flexibility and Reliability are two key aspects of the WinPOS solution that makes it suitable in a variety of different foodservice concepts. With an embedded operating system at its core and a turn-key design, WinPOS is designed for reliability and performance.

Designed for a variety of restaurant concepts

- Quick Service
- Diner
- Cafeteria
- Casual Dining
- Bar and Nightclub

- No Single Point of Failure
- Full POS functionality
- Unsurpassed Flexibility
- VISA validated PABP compliant
- No Back Office PC required

Secure

As security measures become tighter to protect the identity of consumers, it is important that POS solutions are secure in their implementation. WinPOS has been designed to operate a secure environment for processing credit card transactions and has been certified by VISA as PABP compliant.

Customizable

Customize screens to create operation specific transaction flow. Flexible screen designer allows for graphical images, shapes, button size and positions. This flexibility is key to designing a screen layout that is the most efficient and appropriate for the store operations.

Quick Service

WinPOS is equipped to handle all sizes of quick service operations. It possesses all of operational and management functionality that are key to running an efficient QSR operation.

- Combo meal recognition
- Dual Drive-Thru modes
- Integrated Inventory
- Optional Kitchen Video system
- Order Confirmation Board and Coin Changer Interfaces

Table Service

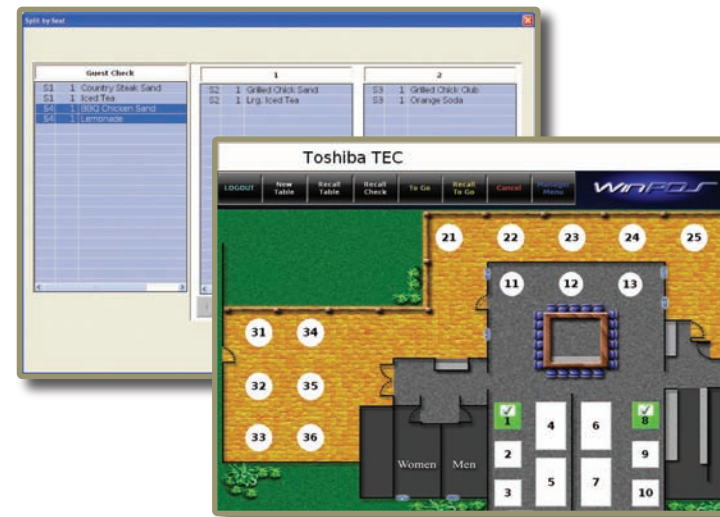

WinPOS can be easily designed to allow for the various styles of restaurant management.

From the start of the order process, the various transitions that a guest check can be subject to are handled quickly and efficiently. Whether in a Cashier style operation or full service using a banked wait staff concept, WinPOS has all of the necessary management control and report tracking to provide an accurate view of the day's business.

- On-Screen Table Management
- Create Separate Checks Quickly and Easily
- Kitchen messaging
- Auto Gratuity settings
- House Accounts

Management Control

WinPOS is equipped to provide restaurant management with the tools they need to manage their foodservice operations by taking advantage of the benefits offered by this powerful POS system.

Full Reporting available at any terminal

A full list of comprehensive reports are available to provide restaurant managers and owners with the necessary details of the establishment to make solid decisions regarding their business.

- System Financial
- Product Mix
- Labor to Sales
- Meal Period Readings
- Server Tracking

Inventory

An integrated Inventory system accurately tracks product and ingredient usage by way of Recipe Definitions and Product Mix information. Item count down feature can signal the wait staff that a particular product is no longer available, while Inventory Reports provide usage details and food cost information.

Programming

With WinPOS, no back office PC is required to make changes or add to the system tables. All menu item, employee, screen design, etc. are performed directly on the POS terminal in an easy to use programming mode using a on screen touch keyboard. Changes are accomplished easily and are immediately available to all stations in the POS system.

Timekeeping

Using the available timeclock feature, WinPOS will help managers capture the valuable information necessary to control labor costs. Detailed time clock reports will provide employee punch time data with accumulated pay period totals, as well as additional reports to provide critical labor to sales information.

Expandable

- Kitchen Video
- Order Confirmation Board
- Integrated Credit Authorization
- Coin Dispenser
- Barcode Scanner
- Scale
- Liquor Dispenser
